

I'm sorry, but the text you provided appears to be snippets of HTML and CSS code with some random words and does not contain meaningful information to create multiple-choice questions.

To generate relevant MCQs, please provide a coherent and informative text.

For example, you could provide:

- * An excerpt from a history book
- * A paragraph about a scientific concept
- * A summary of a news article

Once you provide me with suitable text, I will be happy to help you generate MCQs.
